The Reply® Interact Pro keypad or clicker is a "credit card" style keypad, using re-chargeable batteries to provide greater speed and range than any other keypad in the same class. With 10 standard buttons for user input (1-10 (0), A-J, Yes/No/Abstain), plus 4 other command keys and support for up to 2000 keypads per base station, it is the perfect size for meeting applications. It includes a dot matrix LCD which confirms user key presses and indicates response confirmation as well as enabling the display of pre-loaded candidates for elections or batch voting and receiving of text up to 140 characters. The Reply® Interact Pro, compact and lightweight, is ideal for all events large or small, especially shareholder/AGM meetings, Trade Union/Association Meetings and all manner of Candidate Elections.
